

JOB POSTING

Position: Application Developer

Focus: Application development for the Energy Transmission Industry

Salary: Commensurate with experience: Minimum \$35,000.00 + Full Benefits

Location: Lexington, KY

Job Description

Design, develop, test, implement and document scalable applications in a C# .Net 2.0 environment. Strong ADO.Net skills required along with database experience primarily with Oracle/SQL Server/Access. Additionally, experience using and customizing ESRI products including ArcGIS, ArcSDE, and ArcGIS Server would be considered as assets.

Company sponsored travel to client locations and other Global Information Systems offices will be required periodically for consultation, analysis, implementation, and end user training.

Applicant Requirements

- Must be able to multi-task, and manage time constraints and make deadlines.
- Must be presentable in business / professional environment in both appearance and demeanor.
- Must be available to work eight hours shifts, Monday through Friday, during business hours.
- Must be able to work in a team environment as well as independently.
- Must have impeccable communication skills in the English language, both written and verbal.
- Must have a minimum of an Associate's degree in Computer Science or GIS with emphasis on application development.
- Must have application development experience with Microsoft products including C# and ADO.NET.
- Must have experience with ASP.net as well as HTML for Web development and design.
- Must have experience in development with RDMBS including either ORACLE or MS SQL Server.

Beneficial Skills

- Experience with Web Services and .Net Remoting.
- Experience working with and customizing ESRI GIS products.
- Experience designing and developing against spatial databases.
