**June 14, 2010**

**Global Information Systems, LLC announces the opening of an operation in Kansas City Missouri. The Kansas City office of Global Information Systems, LLC will focus on the consultation and delivery of GIS services to the pipeline and utility industry.**

**We would like to welcome John Spangler, Patrick Boes, Dave Ellerbeck, Tim Eddy, and Deneke Ejigu to the Global team. We look forward to adding their over 75 years of Pipeline GIS knowledge and solutions development to our excellent team of pipeline GIS professionals.**

**John Spangler** – Has joined Global Information Systems as the Director of GIS Applications for the Kansas City Operation. Mr. Spangler brings over 25 years of experience building applications and managing projects within the pipeline industry. Mr. Spangler's leadership in developing industry standard database models and managing key projects involving the integration of GIS and SCADA systems will thrive as he manages the Kansas City team and brings key services to new and existing clients.

**Patrick Boes** – Joins Global as a Sr. GIS Analyst and brings over 10 years of experience in the pipeline and utility GIS market. Mr. Boes experience in overseeing development of tools to assist with management of complex spatial data will be fully leveraged as we launch a new generation of tools to assist our clients with their data management needs. With a wide range of experiences in ESRI GIS, Mr. Boes will bring a well rounded skill set to the Global team and we look forward to his leadership in developing new products and better solutions for our customers.

**Dave Ellerbeck** – Joins Global as a Sr. GIS Analyst and brings over 10 years of industry innovation to both GIS and CAD based systems. Mr. Ellerbeck has comprehensive experience in successfully planning and developing best practices and optimizing off the shelf solutions to empower enterprise level GIS Systems. Many of Mr. Ellerbeck's award winning solutions specialize in the implementation and support phases of ground breaking systems.

**Tim Eddy** – With over 15 years experience in the Pipeline Industry, Mr. Eddy brings a wealth of technical leadership to the Kansas City office as a seasoned Pipeline As-Building Specialist. Mr. Eddy will continue to provide field level practicality to complex problems and will be the key implementer of next generation GIS As-Building solutions in the field.

**Deneke Ejigu** – joins Global as a Sr. Application Developer and brings over 8 years of pipeline application development experience to Global's team. With extensive database and Web development skills, Mr. Ejigu leverages the latest Microsoft technologies to simplify pipeline decision making through the use of web based mapping and visualization technologies.

**About Us** - Global Information Systems is a customer service focused organization, representing the next evolution in technology service providers for the energy transmission industry. Our dedication to configurable solutions that leverage the best in technology and user focused ergonomics along with our commitment to the complete satisfaction of our customers is the cornerstone of our company structure; It is what has led to our rapid growth and solid position as the company that is the envy of our competition.
