

Position: GIS Application Developer II

Focus: RDBMS and GIS for the Pipeline Transmission Industry

Salary: \$55,000.00 to \$75,000.00 + full benefits

Reports to: Lead Application Developer

Location: Lexington, KY

Job Description

The successful candidate will have a strong background utilizing systematic processes to design, develop, test, implement, and support custom applications developed in a C# .net environment. Strong ADO.Net skills are essential along with database experience in Oracle and/or SQL Server. Additionally, experience using and customizing ESRI products including ArcGIS, ArcSDE, and ArcGIS Server would be considered as assets.

Company sponsored travel to client locations and other offices will be required periodically for consultation, analysis, implementation, and end user training.

Applicant Requirements

- Associate's degree in Computer Science or GIS with emphasis on application development.
- At least four years of application development with Microsoft products and at least 2 years C# and ADO.NET experience.
- At least four year's experience with RDMBS including ORACLE or MS SQL Server.
- Must have impeccable communication skills in the English language, both written and verbal.
- Must be presentable in business / professional environment in both appearance and demeanor.
- Must be able to work in a team environment as well as independently,
- Must be able to multi-task, and manage time constraints and make deadlines.

Beneficial Skills

- Experience with ESRI ArcObjects in a ArcMap, ArcEngine , or ArcGIS Server environment
- Experience Designing and Developing against spatial databases such as the ESRI Geodatabase
- Experience with spatial analysis
