

**Position: Database Developer**

Focus: Database integration and IBM Maximo development for the Energy Transmission Industry

Salary: Commensurate with Experience

Location: Lexington, KY

Status: Full Time, Full Benefits

**Job Description**

Responsibilities include: Database development for IBM Maximo systems implemented on Oracle platforms in support of business processes within the energy transmission industry; integration of disparate business systems at the relational database level; hands on database work to integrate various spatial and relational database systems while creating and maintaining an enterprise level Service Oriented Architecture utilized by applications throughout an organization; interfacing with customers at various organizational levels from individual technical consulting to group training environments; requirements gathering and liaison / team participation with Lexington KY based RDBMS and application development team.

Company sponsored travel to client locations and other Global Information Systems offices will be required regularly for consultation, analysis, implementation, and end user training. On-site (at customer location) training and orientation will consume approximately 50% or more of the initial six months of job performance. Once sufficiently trained, On-site (at customer location) presence will be reduced to approximately 25%.

**Applicant Requirements**

- Must have a minimum of an Associate's degree in Computer Science with emphasis on database development, application development, and/or database administration.
- Must have 3 years SQL experience with Oracle, MS SQL Server or other enterprise level RDBMS.
- Must have Database integration experience.
- Must have experience in the creation of documentation to support integration efforts.
- Must have impeccable communication and comprehension skills in the English language, both written and verbal.
- Must be well spoken and presentable in a professional energy industry environment in both appearance and demeanor.
- Must be able to multi-task, and manage time constraints and make deadlines.
- Must be able to work in a team environment as well as independently.
- Must be available to work on-site at customer locations for one or more weeks per month.
- Must be permanently located in the greater Lexington, KY area.
- Must be available to work eight hour shifts, Monday through Friday, during business hours.

## **Beneficial Skills**

- Oracle Database development and administration experience,
- IBM Maximo Experience,
- IBM Maximo Experience implemented on an Oracle 10g Database,
- Experience with Maximo Enterprise Adapter (MEA) framework,
- Design and Development custom reports from Maximo,
- .Net Development Experience with ADO.Net,
- Experience with web services,
- Experience in designing and developing against spatial databases,
- Experience working with and customizing ESRI GIS products,
- Experience with Web development and design.
