

PROJECT PULSE

Pipeline Construction Management in Real Time from Anywhere

-  **ACT FASTER.** Pipeline construction projects have many moving parts with large budgets, razor-thin margins, multiple stake holders, and aggressive schedules. A breakdown in any of these areas could spell disaster.
-  **REDUCE RISK.** Project Pulse is the only construction performance management solution designed and built specifically for linear construction projects. Project managers in the field and executives in the office can update and monitor all facets of the job.
-  **RUN EFFICIENTLY.** Do more with less. Project Pulse guides your project through potential hurdles and pitfalls to **finish successful, on-time and under budget.**

**SCHEDULE A
LIVE DEMO!**

“Project Pulse increases our project efficiency, allowing us to recognize potential issues before they affect the bottom line, make appropriate decisions quicker, and ultimately complete projects on-time/under budget.”

—Brian Luis
Director, Upstream Infrastructure, Cheniere Energy, Inc.
